

AN OVERVIEW OF SHOVEL

DOWNLOAD

SYNCING APPS

Shovel allows you to sync all your assignments and events from **Canvas**. You can also sync your Outlook, Google, and Apple calendars.

[Sync Other Apps →](#)

LAYOUT

Let's take a look at the **Calendar** view. Here you can see your classes, study time, tasks, other events, and your sleep schedule. Any time that hasn't been assigned to a class or event will be considered study time. You can adjust the minimum amount of time needed to be considered study time in settings. The **To-Do List** view allows you to see all current and upcoming assignments so you can stay on track...or get ahead! You can also add these tasks to your calendar!

The screenshot displays the Shovel app interface. On the left, there is a sidebar with navigation options: 'All tasks', 'Courses', 'Activities', and 'Trash'. The 'Courses' section is expanded, showing 'English' and 'Psychology'. The 'English' course has a 'Class prep (6 tasks)' list, and the 'Psychology' course has an 'Assignment (21 tasks)' list. The main area shows a 'Task List' view with a table of tasks. The table has columns for 'NAME', 'DUE DATE', 'DURATION', 'REPEAT', and 'STATUS'. The tasks listed include 'The Conversation: Read...', 'Midterm Exam: Reading...', and 'The Importance of Read...'. Below the task list, there is a 'Calendar' view showing a weekly schedule from Monday to Sunday. The calendar includes various events such as 'Economics', 'Soc 100', 'Math', 'Biology', 'Meal', 'Workout', and 'Lecture'. The calendar also shows '20m commute' blocks and '2 tasks due' indicators for each day.

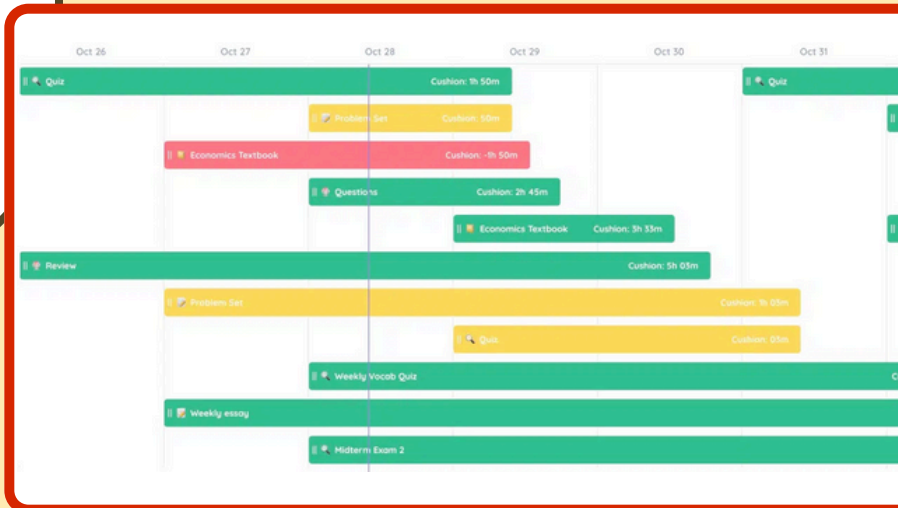

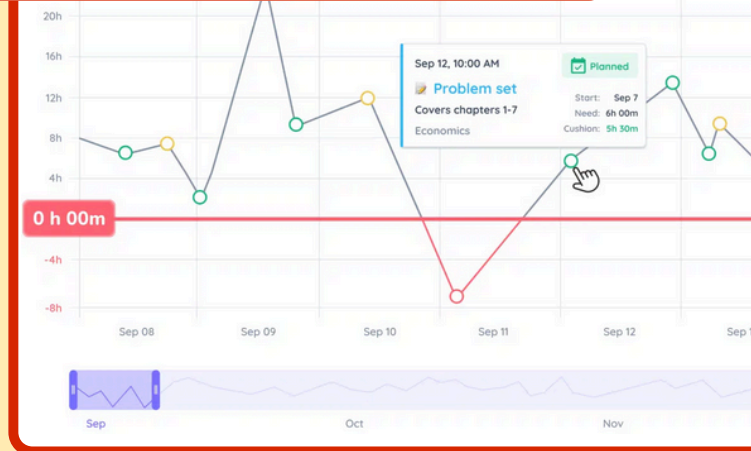

TOOLS

Task Timer

- Can be used to predict the amount of time needed for future assignments
- Allows you to calculate time per page for readings

Cushion Graph + Timeline View

- Calculates your “cushion” for each assignment (*time available – time needed*)
- **GREEN** = time available > time needed → *You're on track!*
- **YELLOW** = time available = time needed → *Start now!*
- **RED** = time available < time needed → *Adjust your schedule to find more time!*

DATA
Figure out how much you study for each class and learn how your study habits change over time!
